Taxonomy performance by category

Repository role — antivirus / file scanner
Repository role — demo
Repository role — detection framework
Repository role — detection platform
Repository role — native detector
Repository role — out of scope
Repository role — rules content
Repository role — support tooling
Repository role — traffic analyzer
Repository role — uncertain
Observation scope — application
Observation scope — host endpoint
Observation scope — multi scope
Observation scope — network
Observation scope — unknown
Observation scope — wireless
Observation object — file analysis
Observation object — flow analysis
Observation object — log analysis
Observation object — packet analysis
Observation object — system calls
Observation object — unknown
Capability — detection
Capability — monitoring
Capability — prevention
Detection method — anomaly based
Detection method — nn based
Detection method — protocol analysis
Detection method — rule based
Detection method — signature based
Detection method — unknown
Primary security system type — APIDS
Primary security system type — AV
Primary security system type — HIDS
Primary security system type — HIPS
Primary security system type — IDS
Primary security system type — IPS
Primary security system type — NIDS
Primary security system type — NIPS
Primary security system type — NSM
Primary security system type — PIDS
Primary security system type — SM
Primary security system type — Unknown
Primary security system type — WIDS
Primary security system type — XDR
Security system types — APIDS
Security system types — AV
Security system types — HIDS
Security system types — HIPS
Security system types — IDS
Security system types — IPS
Security system types — NIDS
Security system types — NIPS
Security system types — NSM
Security system types — PIDS
Security system types — SM
Security system types — Unknown
Security system types — WIDS
Security system types — XDR
IDS centralization — centralized
IDS centralization — hierarchical
